

			GOVERNMENTS
ISSUE/NAME	(Adam Smith Institute) Internet Freedom: A free market digital manifesto	(WEF) Informed Societies: Towards a Code of Conduct for Government Leaders	(CoE) Declaration on Internet governance principles
URL	http://www.adamsmith.org/sites/default/files/research/files/InternetFreedomASI.pdf	http://www3.weforum.org/docs/WEF_GAC_InformedSocieties_CodeConductGovernme	https://wcd.coe.int/ViewDoc.jsp?id=1835773
(principles of procedure)			
Compliance to international standards/Declarations			
General Accordance with other rights/declarations	n/a	n/a	[1. Human rights, democracy and the rule of law] (sentence1) Internet governance arrangements must ensure the protection of all fundamental rights and freedoms and affirm their universality, indivisibility, interdependence and interrelation in accordance with international human rights law.
Governance structure			
Multistakeholder governance	n/a	n/a	[2. Multi-stakeholder governance] The development and implementation of Internet governance arrangements should ensure, in an open, transparent and accountable manner, the full participation of governments, the private sector, civil society, the technical community and users, taking into account their specific roles and responsibilities. The development of international Internet-related public policies and Internet governance arrangements should enable full and equal participation of all stakeholders from all countries.
democracy and the rule of law	(1) Upholding the rule of law in digital commerce by using and enforcing existing laws around monopoly, antitrust and market conduct instead of creating new legislation	n/a	[1. Human rights, democracy and the rule of law] (sentence1 moved to General Accordance with other international laws) They must also ensure full respect for democracy and the rule of law and should promote sustainable development. All public and private actors should recognise and uphold human rights and fundamental freedoms in their operations and activities, as well as in the design of new technologies, services and applications. They should be aware of developments leading to the enhancement of, as well as threats to, fundamental rights and freedoms, and fully participate in efforts aimed at recognising newly emerging rights
Decentralization	n/a	n/a	[7. Decentralised management] The decentralised nature of the responsibility for the day-to-day management of the Internet should be preserved. The bodies responsible for the technical and management aspects of the Internet, as well as the private sector should retain their leading role in technical and operational matters while ensuring transparency and being accountable to the global community for those actions which have an impact on public policy.

Transparency/Transparency governance	n/a	[transparency] Governments should embrace transparency, not fight it. • Governments have an obligation to create transparency and to communicate pertinent information to their citizens. (sentence2 moved to Freedom of expression) (sentence3 moved to Code of Conduct)	n/a
Code of Conduct/Best Practices of a sector	n/a	[transparency] (sentence 3) • Governments should foster an environment for media organizations to embrace self-regulation. Media organizations hold a powerful position in society through the impact of their content, and it is therefore essential that they act in a manner that is responsible, transparent and accountable.	n/a
Instrument Enforcement			
Enforcement (principles of subject matter)	n/a	n/a	n/a
General			
[Hardware]			
Internet Accessibility			
Access to internet	n/a	n/a	n/a
Universality of the Internet	n/a	n/a	[5. Universality of the Internet] Internet-related policies should recognise the global nature of the Internet and the objective of universal access. They should not adversely affect the unimpeded flow of transboundary Internet traffic.
Broadband development	n/a	n/a	n/a
Net reliability	n/a	n/a	[6. Integrity of the Internet] The security, stability, robustness and resilience of the Internet as well as its ability to evolve should be the key objectives of Internet governance. In order to preserve the integrity and ongoing functioning of the Internet infrastructure, as well as users' trust and reliance on the Internet, it is necessary to promote national and international multi-stakeholder co-operation.
Open standards	n/a	n/a	[8. Architectural principles] The open standards and the interoperability of the Internet as well as its end-to-end nature should be preserved. These principles should guide all stakeholders in their decisions related to Internet governance. There should be no unreasonable barriers to entry for new users or legitimate uses of the Internet, or unnecessary burdens which could affect the potential for innovation in respect of technologies and services.
Interoperability	n/a	n/a	n/a

Net Neutrality	n/a	n/a	[9. Open network] Users should have the greatest possible access to Internet-based content, applications and services of their choice, whether or not they are offered free of charge, using suitable devices of their choice. Traffic management measures which have an impact on the enjoyment of fundamental rights and freedoms, in particular the right to freedom of expression and to impart and receive information regardless of frontiers, as well as the right to respect for private life, must meet the requirements of international law on the protection of freedom of expression and access to information, and the right to respect for private life.
[content]			
fundamental rights			
Access to knowledge (IP etc)	n/a	n/a	n/a
Right to dignity	n/a	n/a	n/a
family autonomy	(2) Protecting families from government intervention designed to impose state-sanctioned parenting on children.	n/a	n/a
Education	n/a	n/a	n/a
Duties and Responsibilities	n/a	n/a	n/a
participation			
right to participation	n/a	n/a	[4. Empowerment of Internet users] Users should be fully empowered to exercise their fundamental rights and freedoms, make informed decisions and participate in Internet governance arrangements, in particular in governance mechanisms and in the development of Internet-related public policy, in full confidence and freedom.
right to association	n/a	n/a	n/a
user empowerment			
user awareness	n/a	n/a	n/a
media/digital literacy	n/a	[Media Literacy] Governments should take steps to encourage media literacy and an informed citizenry. • First and foremost, governments should not censor. • Governments should create an environment in which ideas can be exchanged freely, on and off the Internet. • Governments should help build media literacy into educational curricula. • As resources permit, governments can adopt policies that encourage better communication infrastructure, including mobile and fixed Internet access. • Governments should encourage the development of new media industries in their countries and support independent media, especially in the developing world.	n/a

freedom of expression			
Freedom of expression	n/a	<p>[transparency] (sentence2)</p> <ul style="list-style-type: none"> • Governments should take steps to ensure freedom of information. This may include legislation, regulation, education, and partnering with public and private sector organizations to encourage openness. <p>[Media freedom, Internet neutrality and open markets]</p> <ul style="list-style-type: none"> • Governments should enact policies that protect media freedom and the openness of the Internet. • Governments should adopt policies that foster connectivity and competitive media markets. • Governments should create an enabling environment for independent media, especially in the developing world. • Governments should be vigilant against anti-competitive or anti-free-speech steps by private and public actors that might undermine the neutrality of the Internet. 	n/a
Freedom of (religious) belief	n/a	n/a	n/a
censorship		n/a	
Privacy			
Privacy	n/a	<p>[Privacy]</p> <p>It is inevitable that the data available about each of us will continue to grow. Governments and business should understand that the need for security and profit must be tempered by the need for freedom, rooted in individual privacy.</p> <ul style="list-style-type: none"> • Governments should help educate citizens about the right to privacy. • Governments should implement policies to prevent the inappropriate use of personal information, and should be at the forefront of setting high standards for all institutions. 	n/a
Data Protection	n/a	n/a	n/a
Individual Control over personal data	n/a	n/a	n/a
Surveillance	n/a	n/a	n/a
development			
Development (social and economic)	n/a	n/a	n/a
Green ICT	n/a		n/a
